Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 25-26, 28-45 are rejected under 35 U.S.C. 102(b) as being anticipated by Robert Cassou (FR 2574919). Robet Cassou discloses a receptacle/tube 1 having a proximal end 11 and a distal end (other end), comprising an inner wall with coaxial tube 2 and an outer wall with an outer tube surrounding the inner tube 2 defining an annular portion 5 therebetween adapted for receiving liquid therein through orifice 10, and an inner space defined by the inner wall open at each of the proximal and distal ends, enabling passage of fluid via the inner space whilst holding the liquid within the annular portion 5. See Fig. 1-3 and the abstract.

Allowable Subject Matter

Claim 27 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
